Reference MM 02-166

I made an error in my October 18, 2002 statement. I had stated that: *Over flat terrain a Class C station covers a minimum distance of 58 km to a maximum distance of 72 km with a city grade signal from the transmitter site.* The statement should have read: *Over flat terrain a Class C station covers a minimum distance of 58 km to a maximum distance of 68 km with a city grade signal from the transmitter site.* This still would have allowed plenty of area for Millcreek to find a transmitter site for the Coalville, Utah 276C, to the north-northeast of Coalville, that would not have interfered with my Salina, Utah 276C proposal.

To the best of my ability, the information contained in this document is correct. I will apply for the Salina, Utah 276C allotment with the transmitter site on Mount Terrill.

Willison H. Gormly
